

Trial Operations

**Six
Degrees
Medical**

Communicate.
Consult.
Train.

Six Degrees Medical is a leader in global medical communications.

For over a decade, our medical communication services have helped clients optimize their brand, disease and corporate objectives.

Having completed over 400 successful trial operations meetings, we know the work that goes into these meetings has a direct correlation to the success of a trial.

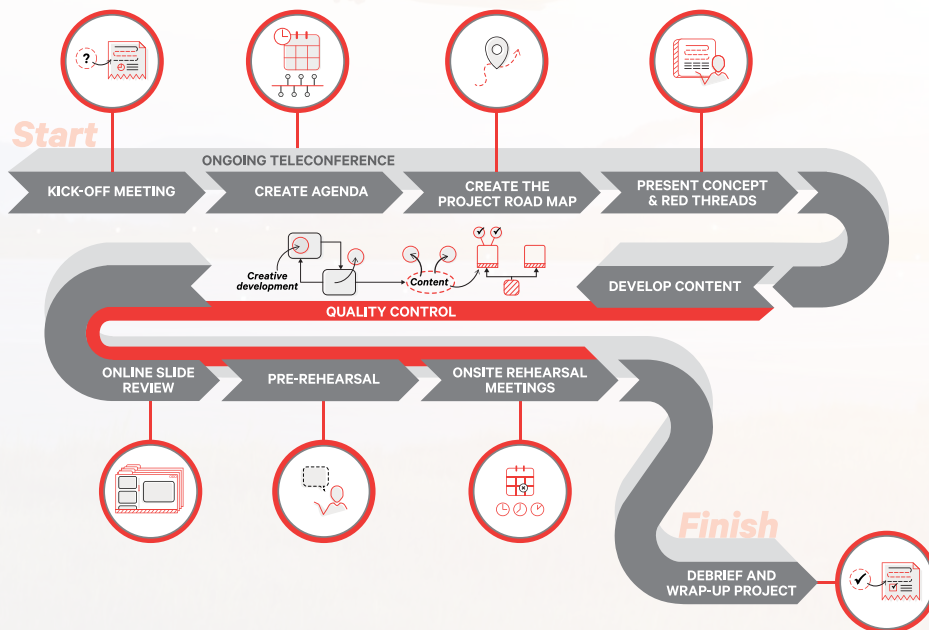

We push the boundaries to develop creative strategies to engage audiences. Our seasoned project managers and medical writers work closely with trial teams and other stakeholders to assess requirements and ensure the meeting experience directly affects sites, motivating them to recruit the right patients and execute the trial ethically and in adherence to the protocol.

Our list of services includes:

- Investigator and monitor meetings
- Mid-study, booster and coordinator meetings
- Results meetings
- Ancillary meetings: Investigator, study coordinator and patient panels
- Outcomes study governance consulting and management
- Patient recruitment materials
- Trial support materials
- Clinical development program visual identity
- Study subject communication strategy
- Speaker/presentation and facilitator skills training

We have completed work across all trial operations meeting types and all phases of clinical trial development.

A snapshot of our trial operations meeting process:

Our project matrix (OurPM™) and creative approach to concept, content and red thread development have earned us a high percentage of repeat business and exceptional evaluation scores.

ABOUT US

Our expertise has been sought after in 34 countries around the world in over 40 therapeutic areas. We come from 12 industries, 11 cultural backgrounds and speak 20 languages. Based in North America and Europe, we bring local perspective and international expertise to every project. Our clients see us as more than just vendors, but as partners invested in their success!

We create learning.
